

TROUBLE SPOT DRYING PASTE

COAT DEFENSE® TROUBLE SPOT DRYING PASTE is a spot treatment for broken skin. It creates a healing environment by forming a scab-like barrier that continuously draws, dries and stops itch. Effective for wounds, scratches, mud fever, cannon crud, dew poisoning, bug bites, summer sores and proud flesh. The paste allows for the immune system to quickly repair skin cells.

NON-TOXIC, TALC-FREE, AND USEF & FEI COMPLIANT.

USES:

- Speeds healing on insect bites, scratches, wounds, summer sores and proud flesh.
- Relieves itch caused by insect bites, sweet itch, inflammation and cellulitis.
- Acts as a poultice on inflammation and cellulitis.
- Creates a barrier between insects and horses' skin when applied in a diluted formula.
- Prevents summer sores by creating a barrier when applied to broken skin.
- Humans love it for bites, stings, poison ivy, acne, and splinters!

DIRECTIONS:

- Prior to application, gently clean any dirt or debris from treatment area. **DO NOT pick off any existing scabs.** Allow scabs to fall off on their own with Paste.
- Using fingertips, scoop paste from container, and spread thickly over treatment area. Spread as if covering bread with peanut butter, spread to surrounding areas and down to the skin. Do not rub in.
- Let paste dry to a near white shell and leave on for several days.
- Reapply as necessary until skin is fully healed.
- For open wounds, to achieve better adhesion of the paste, first dry oozing by patting with a clean cloth and/or applying **COAT DEFENSE® daily Preventative Powder.**
- Paste is also effective if thinned out with water or witch hazel. A more paint like layer of the paste provides an effective barrier between exposed skin (ears, bellies, etc.) and biting insects.
- To remove, please wet first. Paste become abrasive when it is dry.
- Use **COAT DEFENSE® daily Preventative Powder** to prevent future flare-ups. It's a game changer for prevention!

For dark horses: In very rare instances, regular use of **COAT DEFENSE® TROUBLE SPOT DRYING PASTE** may magnify the lightening effect of the sunlight and sweat. For our peace of mind, please test in a small area first.

Something Better for you, your animals, and the planet we share.
