Bleeders or other severe respiratory conditions: give a 15cc twice daily

### **Testimonial:**

"I have been a trainer for over 40 years. Recently which I very rarely try a new product. Only reason I did is I trust the people who make as I have been using their Body Builder for last 7 years. Bottom line I used their Air Blast product with a couple of horses that are good, try all the time but come up short. Bottom line 4 starts 3 wins, 1 second. I noticed the finished much better and when they came back to the paddock you couldn't blow out a candle from their breath!! They obviously were and able to breath much- much better, therefore the results!!"

- P. Palmer
