

**INGREDIENTS:**

Ionized Cooper (Cu) .....	0.134%
Ionized Zinc (Zn) .....	0.700%
Nonionized Surfactant .....	1.400%
Inert Ingredients .....	97.766%

**SUGGESTED USE:**

Farrier's Hoof™ will not stain the coat or irritate the skin. Farrier's Hoof™ Topical Spray is designed to help maintain normal hoof conditions in horses. Spraying on a regular basis will help maintain normal hooves during damp or adverse weather conditions.

**DIRECTIONS FOR USE:**

Shake well before using. Clean the hoof as thoroughly as possible and spray Farrier's Hoof™ Topical Spray 2-3 times a day to saturate. After spraying, contain the horse to a clean dry area if possible. It is recommended to spray all the hooves. If condition persists, consult your veterinarian.
