

DIRECTIONS:

Clean hoof wall with Acetone, Ketone, or SBS Hoof Cleaner. Hoof wall **MUST** be thoroughly clean and dry. Create desired undercuts in void. Mix equal portions of each tube with mixing stick for 30 seconds. Work crack filler in void and overfill. Use reinforcing mesh for larger cracks. Once cured (approximately 15 minutes), rasp to desired finish. Crack filler is cured when you cannot dent it with your fingernail

SBS CRACK FILLER KIT

- Cures in Minutes
