What does Daily Red do?

It takes the guesswork out of meeting your horse's mineral needs! Daily Red provides a full complement of all major trace minerals, plus key vitamins to support the immune system, vision, bones, muscles and nerves. With Daily Red your horse will achieve more vitality and a healthier appearance overall.

What horses will benefit?

Daily Red is particularly well-suited for stall-bound horses, hard-working horses, nutritionally depleted horses, pregnant mares and growing foals.

How do I use it?

Feed two ounces (two scoops) of Daily Red per day, per horse, for a full-sized horse. (See the pouch for other feeding amounts.) Simply top dress it on your horse's feed, or feed separately, free choice. For best results, don't feed Daily Red in combination with other salt blocks.

How long does it last?

If fed daily using the typical feeding amount (two scoops), one tub of Daily Red will last 40 days.
