Water n Hole

Water-n-Hole slosh-proof bucket rim has a unique design that keeps water from sloshing out of the bucket even while trailering down the road, yet is soft and stretchy enough for your horse to drink all the way to the bottom. Soft sides cushion the horse's face.

- Nylon and neoprene material make it ideal for messy eaters as well.
- No more spilled feed on the ground.
- Ideal for feeding at the big show or on the trail.
- Small fits any flat-backed or round bucket up to 8 qt size.
- Large fits any flat-backed or round bucket 20-24 qt size.
