

# BRUSH BOOTS

## 3D MESH

### SIZE CHART

The measurements are a guide to finding the correct size.

- Measure in cm by using a soft measuring tape.
- Make sure that your horse is in a relaxed state and is standing properly.
- The height measurements in the chart represent the actual height of the boots.

Measuring instructions:

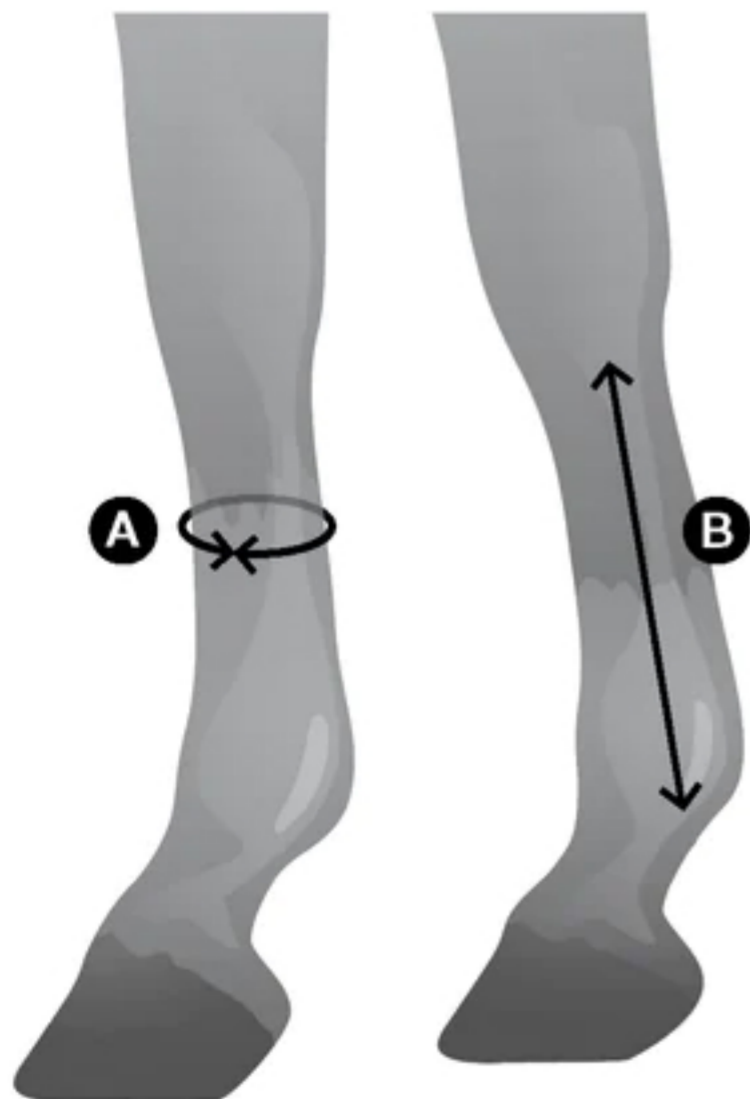

- A** Measure the circumference of the horse's cannon.
- B** Measure the height on the inside of the leg, from the top of the cannon to just below the fetlock.

Determine your horse's size by comparing the measurements in the chart to those of your horse's legs where the boots should sit.

SIZE OF BOOT	S	M	L	XL
<b>A</b> Circumference	18 - 22	21 - 25	24 - 28	27 - 31
<b>B</b> Height (of boot)	24,5	28	30	32

Art.No. 2080
