

A horse's topline are muscles that support the spine, from the neck to the hindquarters and play an important role in a horse's performance, appearance and attitude. Poor topline is usually blamed on exercise, saddle fit, genetics and age related decline. Key nutrients play the most critical role, and is often overlooked as a solution to build and maintain healthy muscle condition and topline. It is proven that a healthy topline is key to fewer injuries. Exercise will condition the muscles that are present, but work by itself does not build or maintain muscle. To repair, build and recover topline muscles, a balanced and targeted amino acid profile and specifically high quality proteins along with vitamins and minerals must be present. Amino acids are building blocks of proteins which form muscles giving your horse the power to perform. **Total Top Line** is your solution to quickly build and maintain healthy muscle tissue and top line during training, recovery, young horse development or rehabilitation. **Total Top Line** is solely formulated to build and maintain muscle tissue and performance.

MAY BE  
BENEFICIAL FOR:

- Building topline
- Building muscle
- Increased performance
- Young horse development
- Increased and maintenance of muscle during recovery and rehabilitation

Directions for use:

Administer one 31 gram scoop daily for maintenance. Use twice daily for rehabilitation & recovery

	Horses or Ponies up to 500lbs.	Horses up to 1,200 lbs
Building Topline	1/2 Scoop Daily	1 Scoop Daily
Building Muscle & Performance	1/2 Scoop Daily	1 Scoop Daily
Rehabilitation & Recovery	1 Scoop Daily	2 Scoops Daily

Guaranteed Analysis per scoop

31 grams per scoop  
30 Scoops Per Container:

	Amount Per Scoop	% Per Scoop
Protein (Min)	4g	12.9%
Crude Fat (Min)		%
Crude Fiber (Min)		%
Phosphorus (as di-calcium phosphate)	700 mg	2.2%
