- Proven to provide significant reduction in hoof heat for up to 24 hours*
- Developed by a veterinarian and trusted by top farriers

*Thermal imaging study conducted September 2012.

Proven Results

Baseline: 92.7°F

24 hours post application: 83.7°F

Active Ingredients: Turpentine 27%, Iodine 0.12%
Inactive Ingredients: Natural Leather and Wool Fibers, Rosin

Directions for Use: Thoroughly clean all areas of the frog and sole using a hoof pick and a stiff brush. Use disposable gloves to apply enough product to cover the sole and sulci of the frog to a depth of ½ inch. For shod horses, place hoof down in sawdust to keep hoof packing in place. For barefoot horses, cover sole with paper or plastic, then cover entire hoof with self-adhering wrap. Replace every 24-48 hours until condition improves. For use under shoes and pads, apply product prior to nailing or gluing on pads and shoes.

Excess product may be removed with isopropyl alcohol.

Caution: COMBUSTIBLE. KEEP OUT OF REACH OF CHILDREN AND OTHER ANIMALS.

FOR EXTERNAL USE ONLY ON ANIMALS.

Not for human use. Avoid getting into eyes or mucous membranes.

Do not apply to irritated skin. If excessive irritation develops, discontinue use. Do not allow prolonged contact with horse's skin above hoof.

**Based on an average 3 ounce application. Adjust according to your horse's hoof size.
