"Since feeding Renew Gold, I have noticed better utilization of feed, more consistent temperament, and better hoof and hair coat condition."  
**Sherry Cervi**

"In the competition that I'm in I'm competing against the best, so I need to feed the best. Renew Gold is the best."  
**Jaton Lord**

"This is a great well researched and developed horse feed... I highly recommend this feed!!"  
**Dena Kirkpatrick**

#### What is Renew Gold™?

Renew Gold is a unique formulation of energy dense, low starch, premium quality ingredients designed to be fed at a rate of 1/2 pound to 1 1/2 pounds daily. Our goal is to limit or eliminate the use of high starch, grain based, ingredients in the overall feeding program. This can help to bring the entire digestive system into proper balance so that it can function the way nature intended. Starting with a base of food grade Stabilized Rice Bran, we fortify Renew Gold with **CoolStance®** coconut meal and Flax. Digestive efficiency is then further enhanced with the addition of Fermented Yeast Culture. Renew Gold is Calcium / Phosphorus balanced, and certified Non-GMO.

#### So, how does Renew Gold work?

The proprietary formulation of Renew Gold can benefit your horse in a number of ways.

The first is to support a healthy environment in the horses' hind gut for optimum utilization of the most natural source of energy for a horse, its roughage. Whether it is hay or pasture, the digestive system of the horse is designed to meet most of its energy needs in this way. High starch rations can disrupt the hind gut and minimize its efficiency to the point that much of your hay may be wasted. Greatly limiting or eliminating high starch loads

found in grain based feeds gives the hind gut a clearer pathway to efficiency, and better utilization of the hay that you feed.

The second benefit can be found higher in the horses system by providing additional energy and efficiency with a smaller, denser feed rate that actually fits in the digestive system without overloading it. We refer to this as "supplementing energy with the smallest footprint". The benefits are real, and we guarantee that you will see them every time, or your money back.

#### Results you can count on.

As the people who introduced Stabilized Rice Bran to the equine market more than twenty-two years ago, we have been pioneers in the concept of lowering starch, increasing vegetable fat levels, and optimizing fiber in equine diets.

We have proven beyond any doubt that this type of diet can minimize attitude issues and colic risk while promoting calm energy and stamina, the usable kind of energy. Renew Gold is both an evolution of those well proven principals and a revolution in "Whole System Efficiency" that, previously, was just not available. Try Renew Gold, and find the horse that you always knew was in there.

For more information, on just how and why Renew Gold works, please visit us at [www.renewgold.com](http://www.renewgold.com)

"I have moved all of my horses over to Renew Gold, and taken them off all grains. The difference in their coats, mane, tails and hooves is amazing!! Better yet, they are extremely consistent in their work, the hotter ones cool down, and the ones that need more energy have picked up. Renew Gold has been the perfect addition to our feed program, for performance and health, I don't think there is anything better!!!"  
**Shannon & Steffen Peters**

"After a few weeks of using Renew Gold I could see results. The horses maintain a longer energy level without being too hot, their coats are shinier and they appear more fit. The horses love the feed and leave no waste! Renew Gold is a product I truly endorse."  
**Tom Long**
