

SAV-A HOOF SPRAY™

FOR TREATMENT AND PREVENTION OF: White Line Disease, Seedy Toe, Thrush, Candida Yeast, Anaerobic, and Aerobic Bacteria. SAV-A HOOF SPRAY bonds to hoof protein for long lasting protection. Prevents bacteria from reproducing and multiplying. DIRECTIONS: Spray on coronary band, hoof wall, nail holes, under shoes and pads. Apply Spray daily to areas that are infected until defect grows out. CAUTION: Not for oral use. Avoid contact with eyes. Consult your veterinarian for assistance when any deep hoof structures are involved. SAFETY: Sav-A-Hoof Spray is safe for horses, humans, and the environment. It contains no formaldehyde or formalin, peroxide, heavy metals or copper sulfate. ACTIVE INGREDIENT: Methedyn-B.
