EZ TRAP

Traps more flies with no trap odor

3 times the trapping surface of leading sticky fly traps

Insecticide-free, odor-free

Ideal for gardens, patios, back yards and picnic areas

Special long-lasting, rain-proof adhesive

Tips & helpful hints:

- Always place in well-lighted areas. For outdoor use, place in a sunlit location. Indoors, place near a window or electric light.
- Pull up recessed handles and carefully remove trap from box. NOTE: The trap is coated with very sticky adhesive, so handle by top and bottom only.
- For best results, use several traps in different locations.
- Place trap on level surface or hang by the handles. Attach traps together by sliding a wire through the center hole.
- In gardens, hang trap from garden stakes. Stack up to 3 traps per garden stake.
- Replace trap when 80% is covered with insects.
- In areas exposed to wind, stake or weight down the trap, or use double-sided tape on the trap bottom to secure it to a surface.

KEEP OUT OF REACH OF CHILDREN, PETS AND WILDLIFE

ADHESIVE REMOVAL

Remove adhesive from skin or hair with vegetable oil or mineral oil. Work oil into affected area until adhesive dissolves, then wash with shampoo or soap. Citrus-based waterless hand cleaners also work. Repeat treatment if necessary until adhesive is completely removed.
