

FEEDING DIRECTIONS

Feed daily at a rate of 100 IU to 500 IU per 100 lb (200 IU to 1,000 IU per 100 kg) of body weight. The feeding level depends on the type of horse, level of activity, and nutritional and management practices that affect vitamin E needs. One scoop delivers 1,000 IU of vitamin E.

One scoop = 7 grams.

FEEDING RECOMMENDATIONS

Top-dress onto daily grain ration.

Type of Horse	IU/day	Scoops/day
Maintenance.....	1,000	1
Stalled horses or horses maintained on poor pasture	1,000-2,000.....	1-2
Intense training	3,000-5,000.....	3-5
Pregnant and lactating mares	3,000	3
Foals	3,000	3
Stallions.....	3,000	3

For daily levels above 5,000 IU, consult with your veterinarian.

elevate[®]

Maintenance Powder

Natural Vitamin E

A supplemental source of natural vitamin E for all classes of horses

Net Wt. 2 lb (0.91 kg)

GUARANTEED ANALYSIS

	Per 7g	Concentration
Vitamin E (Min.).....	1,000 IU.....	65,000 IU/lb

INGREDIENTS

D-alpha-tocopheryl acetate (natural vitamin E), and dextrose.

INDICATIONS

Elevate Maintenance Powder is ideal for horses maintained on diets composed largely of processed grains and stored forages. Such feedstuffs usually have low vitamin E content; thus, horses require vitamin E supplementation.

Vitamin E status can be determined by measuring serum tocopherol levels. Serum tocopherol levels below 1-2 µg per ml are considered deficient in most animals.

STORAGE

Store in a cool, dry place. Reseal lid during storage.
