

Finish Line™'s Orange-A-Day™ electrolyte is an orange-flavored source of electrolytes and trace minerals.

Directions: We recommend you mix ORANGE-A-DAY™ with the feed. However, ORANGE-A-DAY™ will dissolve in water as well. Fresh water and a salt block or loose salt should always be free choice for your horses.

ORANGE-A-DAY™ contains no non-electrolyte fillers, such as sugar, so you feed less than most other brands. Increased work and increased temperature and humidity will make your horse sweat more, requiring more electrolytes.

We recommend ½ oz daily for horses at rest in a hot environment or for horses performing light work at normal temperatures. Feed 1 oz daily for horses doing moderate work at normal temperatures or light work in hot climates. For heavy training in normal temperatures or moderate work in hot climates feed 1½ oz daily. During intense training in hot, humid climates, feed 2 oz daily. A 1 oz scoop is enclosed.

INGREDIENTS: Salt, potassium chloride, sodium bicarbonate, calcium carbonate, magnesium sulfate, calcium lactate, zinc sulfate, artificial orange flavor, manganese sulfate, ferrous sulfate, copper sulfate, cobalt sulfate.
