# TOTAL IMMUNE BLAST

## EQUINE IMMUNE SUPPORT

THE COMPLETE EQUINE IMMUNE PRODUCT WITH NUCLEOTIDES

Net Contents: 30 day supply  
1.12 lbs / 510 grams

## Product Facts Cont.

The next generation in equine immune support. Nucleotides contribute to DNA synthesis as structural units and are therefore a key element in cell replication, which allows the body to heal at a much faster rate. Horses which have a stressed immune system from training, environmental changes or breeding season, will benefit greatly. **Total Immune Blast** will give your foals a jump start to achieve their maximum potential while helping them properly develop their immune system and bone marrow, and gives the mares the support they need while in foal.

The nucleotides in Total Immune Blast are equine specific.

### Basic advantages of Total Immune Blast

- *Helps your horse bounce back quickly.*
- *Supports normal immune response.*
- *May help your horse's body fight the damaging effects of free radicals.*

### Directions for use:

Administer 1 (0.6 oz) scoop per day or as directed by your veterinarian.

### Warnings:

For animal use only.  
Keep out of reach of children and other animals.  
In case of accidental overdose, contact a health professional immediately.

This product should not be given to animals intended for human consumption.
