

**Nutri-Vet Multi-Vite chewables** provide a wide spectrum of vitamins and minerals that complements a dog's normal diet. Tasty liver flavor chewables make it easy to promote health and vitality.

**Directions for Use:** One (1) tablet per 20 lbs of body weight daily.

Guaranteed Analysis per Chewable (All quantities are minimum unless otherwise stated)

Crude Protein – 5%	Zinc – 1.5 mg
Crude Fat – 8%	Iodine – 0.05 mg
Crude Fiber (max) – 18%	Vitamin A – 1,000 IU
Moisture (max) – 10%	Vitamin D3 – 100 IU
Calcium – 6% max-8%	Vitamin E – 2 IU
Phosphorus – 5%	Thiamine – 0.8 mg
Potassium – 0.8%	Riboflavin – 1.0 mg
Chloride – 0.7%	Niacin – 10 mg
Magnesium – 0.2%	Pyridoxine – 0.1 mg
Iron – 3 mg	Vitamin B12 – 0.0005 mg
Copper – 0.1 mg	Ascorbic Acid (Vit C)* – 120 mg
Manganese – 0.25 mg	

\*Not recognized as an essential nutrient by the AAFCO Dog Food Nutrient Profiles.

**Ingredients:** Dicalcium Phosphate, Sucrose, Cellulose, Ascorbic Acid, Liver Powder, Stearic Acid, Natural Flavor, Potassium Chloride, Safflower Oil Powder, Magnesium Stearate, Silicon Dioxide, Niacinamide, Magnesium Oxide, Ferrous Fumarate, Potassium Iodide, Soy Protein, dl-alpha Tocopheryl Acetate, Vitamin A Acetate, Zinc Oxide, Riboflavin, Thiamine Mononitrate, Manganese Sulfate, Copper Sulfate Monohydrate, Vitamin D3 Supplement, Pyridoxine Hydrochloride, Vitamin B12 Supplement.

### Key Components -

Vitamin A is essential for normal skin and mucous membrane health and helps maintain resistance to infections.

Vitamin D is needed for proper absorption of calcium and phosphorus from intestinal tract.

Vitamin E is a potent antioxidant that helps maintain normal skin and mucous membranes, cardiovascular function and a healthy circulatory system. It also protects cells against damaging "free radicals".

Vitamin C supports joint, cardiovascular, cognition, vision and immune health.

Zinc, magnesium, manganese and copper are essential minerals important in many biological reactions in the body.

Thiamine (Vitamin B1) is essential for normal maintenance of the digestive and nervous systems. It assists with cognitive disorders.

Riboflavin (Vitamin B2) is important in promoting release of energy from carbohydrates, fats and proteins and maintaining the integrity of red blood cells.

Niacin (Vitamin B3) is necessary for nervous system and brain function and helps the body release energy from proteins, fats, and carbohydrates during metabolism.

Pyridoxine (Vitamin B6) helps protein build body tissue and aids in fat metabolism.

Vitamin B12 aids in forming red blood cells and support of cardiovascular function. It helps in building genetic material, functioning of the nervous system and metabolizing protein and fat in the body.

**Best Use:** Multivitamin and mineral supplement for dogs between 1 and 7 years of age to help maintain peak condition.
