

# Yucca 5-Way PAC

## FEATURES

- Yucca Schidigera Extract
- Bio-available Trace Minerals
- Yea-Sacc®1026
- May help discomfort associated with normal daily exercise and activity

## INGREDIENTS

Distillers dried grains with solubles, yucca schidigera extract, zinc proteinate, copper proteinate, manganese proteinate, cobalt proteinate, yeast culture, soybean oil, sodium bentonite and natural and artificial flavor.

### AVAILABLE SIZES:

- 5# Bucket • 20# Bucket • 40# Bag

## GUARANTEED ANALYSIS

(Per Scoop – 1 ounce)

Crude Protein (min) . . . . .	12% (3,400 mg)
Crude Fat (min) . . . . .	5% (1,400 mg)
Crude Fiber (max) . . . . .	6% (1,700 mg)
Copper (min) . . . . .	2,000 ppm (56 mg)
Zinc (min) . . . . .	6,200 ppm (176 mg)
Manganese (min) . . . . .	3,200 ppm (90 mg)
Cobalt (min) . . . . .	200 ppm (5.6 mg)
Yucca Schidigera Extract . . . . .	234 mg

## FEEDING DIRECTIONS

**dac® YUCCA 5-WAY PAC** can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals and require a lower feeding rate of **dac® YUCCA 5-WAY PAC**. Feed **dac® YUCCA 5-WAY PAC** at the following rates:

Mature Horse	1 scoop (1 ounce) per horse per day if fed with unfortified grains
--------------	--

Consult an equine nutritionist or **dac®** if feeding with fortified grain. Feeding rate based on 1000 lb. horse.

## SPECIAL INGREDIENTS

**dac® YUCCA 5-WAY PAC** provides a trace mineral profile suitable for all classes of mature horses. Minerals play a critical role in numerous metabolic functions including: reproduction, bone development, nerve function, immune function, hoof, skin and coat quality as well as energy balance.

## DE-ODORASE®

**Yucca Schidigera Extract** – Active components of yucca include steroidal saponins and polyphenolics such as resveratrol and yuccaols. Yucca phenolics also are antioxidants and free-radical scavengers which may aid horse health. Yucca has also been known for its ability to reduce ammonia (NH3) from animal waste. The **Yucca Schidigera Extract** used in **dac® YUCCA 5-WAY PAC** is a high quality source provided by Alltech® branded De-Odorase®.

## YEASACC®

**Yea-Sacc®1026** - is a live yeast culture derived from the specific yeast strain *Saccharomyces cerevisiae* 1026. **Yea-Sacc®1026** increases fiber, phosphorus and calcium digestibility in mares, and increases gross energy, total lipids and amino acid absorption. **Yea-Sacc®1026** improves milk availability to foals if administered for 3-4 weeks before and throughout the lactation period.

## BIOPLEX®

**Bio-available Trace Minerals** – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **dac® YUCCA 5-WAY PAC** utilizes organic minerals to increase availability and enhance absorption rates.

**Bio-available Copper** – is essential in the synthesis and maintenance of connective tissue.

**Bio-available Zinc** – is a micro mineral found throughout the body including in bone and muscle.

**Bio-available Manganese** – is essential for the synthesis of chondroitin sulfate necessary in cartilage formation. Deficiency results in abnormal cartilage and bone development.
