Designed for professional show-ring results, **QUIC BRAID** is superior to water or human styling product alternatives. QUIC BRAID offers the perfect "grip" for your fingers, neither slippery nor sticky, for tighter braids, neater bands and minimal stray hairs. QUIC BRAID trains stand-up manes to lie flat. Best of all, QUIC BRAID combs right out without washing, allowing easier mane care for days after the show.

Directions For Braiding & Banding:

1. Shake well. Working one section at a time, spray onto dry or damp clean hair, then braid or band as usual.
2. Re-spray braid or band when finished; later as needed.

Directions For Mane Training:

1. Shake well. Work one section of mane at a time.
2. Spray clean hair until wet with QUIC BRAID.
3. Using a stiff bristle brush, brush the mane forward, angling towards the horse's cheek.
4. Part the next section and repeat, keeping the strands wet so they will dry in place.
5. A stubborn mane will require that you repeat this daily, or several times daily, until the mane remains in place.
