Post-surgical sites • Burns • Cinch fungus • Ring worm

Skin infections • Scratches • Eye infections

Respiratory tract associated infections

Skin ulcers • E.Coli • Salmonella

Strep • Staph (MRSA)

HydroGel Spray

16 fl oz (473 ml)

One-step topical water-based HydroGel spray that cleans wounds, treats infections and kills bacteria including antibiotic-resistant MRSA. Use to treat topical infections and wounds, hot spots, rain rot, outer ear infections, yeast infections and rashes. This steroid-free, antibiotic-free, no-rinse solution is non-toxic and speeds healing.

HydroGel is designed to slowly evaporate, there is no need to wipe away film or residue from previous applications. Made with Microcyn[®] Technology, Vetericyn[®] HydroGel is based on FDA-Cleared Microcyn technology that has been used to treat over one million humans worldwide without a single serious adverse effect. Vetericyn HydroGel kills antibiotic-resistant strains of bacteria as well as fungi, viruses and spores. An oxychlorine compound similar to that produced by the animal's immune system, Vetericyn HydroGel will not harm healthy tissue. Being pH neutral, it should not sting. **Tests free for competitive animals.**

Indications: For management, treatment regimen & acceleration of healing process of traumatic wounds, cuts, abrasions, skin irritations, skin ulcers, post surgical incision sites, burns, scratches, rashes, chronic inflammation, wound odors. In solution this product kills 99.9999% of bacteria, single-celled organisms and fungi making it ideal for prevention & control of infections & maintenance of sanitary conditions by killing bacteria such as E.coli, Salmonella, Staph (MRSA), Strep, Moraxella bovis, Pasteurella & Actinomyces. Safe for use around mouth, nose and eyes.

Directions for use: Shake well before using. Move excess hair from wound area. Clip if necessary. Apply Vetericyn HydroGel liberally on the wound to clean, treat infections and promote healing. Do not remove or wipe off. HydroGel is designed to remain to continue to fight infection, kill pathogens, increase oxygen supply and reduce inflammation, as well as act as a physical barrier to outside elements. Repeat 3-4 times per day until wound is healed. Skin may "pink" after application due to increased blood flow to wound site which will help speed healing. Vetericyn Spray HydroGel also acts as a temporary physical barrier against dirt, flies and other contaminants.
