

Deluxe Field Solar-Pak 6
Model DF-SP-LI
6 volt – Solar/Battery Operated – 25 miles

America's first solar-powered electric fence charger! Laser trimmed, computer precision, solid state circuitry provides reliable, powerful low impedance shock to end of the fence. Uses free energy from the sun for maximum shock – day or night. Eliminates need for expensive battery replacement or inconvenient recharging.

At a glance built-in performance meter shows you the fence condition – good, marginal or bad.

Features latest state-of-the-art solar panel with over 42% more battery charging power. Will charge battery even on cloudy days with maximum power in direct sunlight.

Totally weather-proof for outdoor use.

NEW EXCLUSIVE FEATURES NOW AVAILABLE WITH THE PARMAX MODEL DF-SP-LI

When the DF-SP-LI is first turned to ON position, the performance meter on front of fence charger now performs 3 exclusive functions: 1. Meter operation test 2. Battery charge level test 3. Fence charger voltage output on fence.

1. Meter Operation Test: This test will sweep meter needle to full scale and back. This test shows that meter movement is smooth and able to indicate full scale. If meter is functioning correctly the needle will go to the top of green (full scale) and then return to bottom of red.

2. Battery Charge Level Test: The meter will indicate the charge level of the battery. If the meter indicates "RED" the battery should be recharged before operating fence charger. If the meter indicates "YELLOW" the battery is low and should be recharged soon. If the meter indicates "GREEN" the battery has a good charge. To get the most accurate reading of the battery charge level, the battery should be in a no load/no charge state. Battery charge level will be indicated for the first 5 seconds immediately following the Meter Operation Test.

3. Voltage Output: After battery charge level test, the performance meter will begin to indicate amount of voltage on fence: GREEN— good voltage on fence— YELLOW fence voltage low, check fence— RED no voltage on fence, check fence immediately.

Full 3 year warranty covers damage caused by lightning. Six-volt battery warranted one year.
