

INGREDIENTS:

Equiderma Thrush and White Line Treatment 16 oz

DIRECTIONS:

1. Pick your horse's hooves well. Scrub the hoof thoroughly with Equiderma Neem Shampoo to remove all debris from the area. In advanced cases, it may be helpful to consult a skilled farrier to trim the hoof and remove as much infected tissue as possible.
2. Rinse well and towel dry well.
3. Apply Equiderma Thrush Treatment and leave on. Reapply daily until all signs of thrush are gone
