

APPLICATION INSTRUCTIONS

For Hoof Wall Defects:

Hoof should be dry and clean before application. Use fingers or a tongue depressor to press Life Data® Hoof Clay® into areas of concern such as white line separations, crumbling hoof horn, hoof cracks, and old nail holes. As a general guideline apply twice per week in wet conditions and less frequently in dry conditions.

For White Line Disease:

Apply directly to white line area and any hoof wall defects. If barefoot, re-apply twice per week. If shod, pull shoes and apply directly to white line area. Re-apply at each shoe reset. Life Data® Hoof Clay® can be used routinely under shoes as a White Line Disease preventative. Driving the nail through the Hoof Clay helps protect the new nail hole.

For Thrush:

Thoroughly pick, clean and dry the sulci of the frog. Pack the sulci and affected areas with Life Data® Hoof Clay®. Re-apply twice per week.

Life Data® Hoof Clay® can be used routinely to maintain healthy hooves.

Life Data®
