Bates® Stirrup Leathers in Luxe Leather

- Much attention has been paid to the closeness of the Bates® Victrix. To enhance the close-contact feel, we recommend Bates® Stirrup Leathers with Luxe Leather which feature a riveted buckle which is designed to remove one thickness of leather from under the rider's leg.

Why show jumpers will rave about the Bates® Victrix Seat:

- Pin-pointed in their SweetSpot, riders are poised for take off
- Perfectly balanced, riders can stay with their horse's movement effortlessly
- Compact and low profile, riders have freedom to move and trust their instincts
- Unprecedented contact, their lower leg is on and effortlessly stable, their hands are light and they are in command.

Adjustable Flexibloc system

Adjustable Ergonomic Stirrup Bar

Never has a saddle held such power to unlock their horse's best performance:

- Freedom of their shoulder to reach maximum height, under a lightweight saddle
- Comfortable and focused at all times, thanks to a protective cushioning and a tree that flexes with their every movement
- Light and sure footed, with instant recovery thanks to the unsurpassed shock absorbency on their horse's back.

EASY-CHANGE Fit Solution

Together the Bates® Victrix promises you have never been this close to your horse:

- A panel so fine, yet unsurpassed in comfort and protection for your horse
 - Fine-tuned to each:
 - rider for effortless balance and effective communication
 - horse for maximum comfort and freedom of movement
- Maximum close-feel and seamless contact to work in unison.

- Luxe Leather is unique, and the care instructions should be drawn to the customer's attention.
- Luxe Leather is the finest calf leather in the world and should be cared for with regular applications of a rich wax-based balsam such as Bates® Leather Balsam. Applying a protective layer of balsam prior to exposure to rain/water will ensure water beads off the surface and prevent premature wear.
- Prior to riding in the saddle, it is highly recommended that the rider liberally dresses the saddle allowing it to soak in overnight. The overnight process ensures maximum penetration into the leather, helping to seal in the moisture and protect the saddle providing a surface barrier, protecting against wear and color loss. Any of the following are signs your saddle needs greater hydration - (overnight process) color loss, rough surface, or stiffness/dryness. All of these can be reversed with appropriate care when picked up early.
