

Breathable 4-Way Stretch Airmesh Lining - standard on all models

- Provides superior comfort and breathability by wicking away humidity and perspiration
- Made up of thousands of tiny vertical fibers that allow the air to circulate throughout the interior lining surfaces - airmesh allows feet to breathe!
- As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breathe - keeps the boot dry and humidity free
- Nonabrasive and hypoallergenic

Orange Lining = Airmesh

WIXIT Cool-Clad™ Airmesh Lining - bonus

- Features micro-dot perforations
- Wicks moisture away - allows the air to flow more than our traditional airmesh lining
- Keeps feet cooler in warmer temperatures

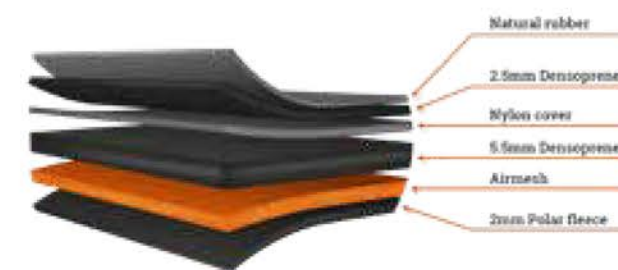

Grey Lining = WIXIT Cool-Clad Airmesh

5 mm DENSOPRENE® Foam Insulated Bootie - standard*

*5 mm standard on all models except those with Cool-Clad lining

- Keeps out the cold and wet – keeps in the warm and the dry!
- Self insulating and waterproof and acts as a neutral medium between inside/outside temperatures
- Flexible 4-way stretch is naturally lightweight, buoyant and very comfortable
- Material keeps foot and lower leg warm and protected

Polar Fleece Lining - bonus

- 6 layers of protection + EVA cold-blocking midsole = 7 layers
- Warmest boots in the Dryshod product line with a comfort rating to -50°F
- Extra 2.5 mm of densoprene on entire foot area provides extra warmth
- Additional 2 mm of polar fleece lining

HYDROKOTE® Water-Repellent - standard on all models

- No more soggy boots! Textile is treated with a nano-scale hydrophobic coating that repels water and mud on contact
- Water rolls off the nylon outer and dries in seconds and keeps the exterior textile from icing up and from retaining water in the fibers

ChemFlex Rubber - bonus

- ChemFlex chemical-resistant rubber withstands just about anything you can step in, pour on or splash through in the barnyard environment

ChemFlex
Chemical Resistant
Rubber Overlay & Tread

Slip Resistant Tread - bonus

- Hard-rubber sole designs that are highly slip resistant on hard surfaces

**Slip Resistant
Tread**

Adjustable Gusset Styles - bonus

- Customize to fit larger calves for optimum comfort and protection with our expandable gusset and adjustable locking strap. Extra room also accommodates layers of clothing being tucked into the boot.

Dryshod makes an entire line of rubber boots that not only keep your feet clean and dry, but also offer dramatically improved support, stability and comfort. With Dryshod, you get **utility with wearability**.

Wearability means a better fit and a more comfortable wearing experience

Flexible, state-of-the-art materials allow for athletic-shoe sizing for a fit you just can't find in any other rubber boot.

Wearability means superior warmth when it's cold without added bulk

Exclusive Densoprene neoprene is a drysuit material known for lightweight maneuverability and insulation without bulk.

Wearability means 100% waterproof top to bottom and no soggy, heavy neoprene

Hydrokote water repellent coating eliminates soaked or iced-up neoprene and rotting due to farm chemicals.

Wearability means the right sole for the job

Natural rubber outsoles in a variety of sole configurations ensure long wear and exceptional traction.

Wearability means solid cushioning for joint-saving comfort

Padded lining coupled with a padded removable insole provide double cushioning. Remove the premium, high-impact insole from a Dryshod boot and feel the inside of the boot. You'll feel a padded base upon which the padded insole rides. This double padding makes for a much more comfortable boot-wearing experience that also goes a long way to protecting all of your joints and lower back from impact stress.

Wearability means boot removal that's easier than ever before

RollDown design makes removal easier than ever, allows for venting. The Densoprene uppers on a Dryshod boot are so flexible that you can literally roll them down to make boot removal much, much easier and cleaner, too. This RollDown design also allows you to tuck in your pant legs or to vent the boots. An oversized heel kick adds to the ease of removing a Dryshod rubber boot.
