SUPERIOR SHINE SPRAY FOR HORSES

EquiFUSE® Shine™ is a first of its kind shine spray for perfecting the equine coat, mane and tail. Infuse hair with a long-lasting superior shine that enhances color instantly, while promoting hair health with each application. Combined with natural benefits from camelina oil, hair is boosted with anti-oxidants and primed to be smooth and soft. Added vitamin E joined with vitamin C finalizes this hydration treatment allowing hair to retain moisture and nutrients. Inspired with a hint of the signature Gleam® fragrance, this soft floral blend will complete the EquiFUSE® grooming experience.

Directions:

EquiFUSE® Shine™ is formulated to be sprayed on a wet or dry coat, mane and tail. For coat application, mist directly on hair and follow with a brush to disperse evenly. For mane and tail, apply, then comb through. EquiFUSE® Shine™ is recommended to be used daily, and works best in conjunction with the EquiFUSE® product line.

Caution: For external use only. Avoid contact with eyes.
