

LaminaSaver

(100% Restauxex®)

A clinically researched, therapeutic health nutraceutical that promotes healthy laminae, new cell regeneration, blood flow circulation, and oxygenation

Equine Powder Concentrate
Net Contents 1 lb (454 g)

FIGUEROA

LaminaSaver is a clinically researched nutraceutical that enhances the body's natural ability to maintain and protect the health of the laminae, hoof capsule, sole frog, white line, bones (coffin, pastern, etc.), and connective tissues. With its proprietary active ingredient, Restauxex®, LaminaSaver increases the body's capability to promote new healthy cell regeneration. Additionally, it promotes keratin and collagen formation for an overall, strong and healthy hoof environment that protects against dry and splitting hooves. LaminaSaver increases oxygen saturation of blood and tissue, promotes maximum oxygen utilization at the cellular level, and peripheral blood flow. LaminaSaver also helps to restore normal blood circulation to the insensitive and sensitive laminae. It encourages tissue elasticity, permeability, and flexibility, and may prevent soft tissue calcification, ossification, and mineralization. LaminaSaver also protects cells against harmful toxins (free radicals) with antioxidant action, and improves resistance to viral and bacterial infections. In addition, LaminaSaver contains anti-inflammatory and pain-relieving phytonutrients that inhibit the inflammatory enzyme COX-2.

Restauxex:

- Helps regenerate new, healthy cells
- Supports a healthy hoof-capsule environment
- Enhances the body's ability to rebuild, repair, and regenerate laminae
- Restores tissue elasticity, permeability, and flexibility
- Helps promote an active metabolism
- Increases blood and tissue oxygenation
- Enhances the body's ability to naturally control pain, inflammation, and swelling
- Suppresses the collagenase and phospholipase enzymes
- Provides antioxidant protection

Administration:

Horses 800 lbs or less: As a loading dose, for the first twelve weeks administer one scoop of product twice daily. Thereafter, for an additional twenty-four weeks administer a half scoop of product twice daily. Lastly, we recommend that the horse remain on a quarter scoop twice daily as a preventative dose.

Horses 801 lbs and above: As a loading dose, for the first twelve weeks administer two scoops of product twice daily. Thereafter, for an additional twenty-four weeks administer one scoop of product twice daily. Lastly, we recommend that the horse remain on a half scoop twice daily as a preventative dose.

Ingredients: Restauxex (A Proprietary Antioxidant Formula).
