

Prestige® EHV - 1/4

Intervet/Merck Animal Health

EQUINE RHINOPNEUMONITIS VACCINE, KILLED VIRUS

A combination of inactivated, concentrated, adjuvanted, tissue culture origin equine herpesvirus types 1 and 4 (EHV-1 and EHV-4).

INDICATIONS: This product has been shown to be effective for the vaccination of healthy horses 6 months of age or older against EHV-1 and EHV-4. For more information regarding safety and efficacy data, go to productdata.aphis.usda.gov.

This product has been shown to be effective against virus shedding of EHV-1 and EHV-4.

DOSE: For primary vaccination aseptically administer 1 mL intramuscularly, repeat with a single dose in 4 - 6 weeks. Historically, annual revaccination with this product has been recommended. The need for annual booster vaccination has not been established for this product. For advice on revaccination in the face of stress or an exposure, consult your veterinarian.

CAUTIONS: Store at 2°-8°C (35°-46°F). Shake well before using. Use entire contents when first opened. Do not mix with other products. This product has not been tested in pregnant animals. Do not vaccinate within 21 days before slaughter. Inject deep into the muscle only. Local reactions may occur at the injection sites in vaccinates. Systemic reactions may also occur in animals following vaccination. If allergic reaction occurs, treat with epinephrine. Care should be used to avoid injecting your own fingers, hands, or other body parts. Accidental injection can cause serious local reactions. In case of human exposure, contact a physician.

ANTIBIOTIC: Gentamicin.

PRESERVATIVE: Thimerosal.
