

# HIGH POTENCY CMPK DRENCH PLUS

## Liquid Oral Supplement for the Prevention of Milk Fever

The right nutrition can prevent illnesses that often spell disaster for cattle. High Potency CMPK Drench Plus provides rapidly absorbing calcium, magnesium, potassium and phosphorus to address issues with milk fever and other nutritional deficiencies. Propylene glycol is added to deter ketosis. These key ingredients make CMPK Drench an economical choice when used as a nutritional supplement.

### Why CMPK Drench?

- Same rapidly absorbing calcium used in High Potency Calcium Gel
- Ideal for pre-and post-calving
- Contains propylene glycol to deter ketosis

# HIGH POTENCY CMPK DRENCH PLUS

Liquid Oral Supplement for the Prevention of Milk Fever

---
