

# **EQUINE POTOMAVAC™**

Merial

Ehrlichia Risticii Bacterin

PHF

**DESCRIPTION:** EQUINE POTOMAVAC™ is a liquid suspension of inactivated Ehrlichia risticii. Safety and efficacy of this product have been demonstrated in controlled vaccination challenge tests and in thorough field evaluations.

**INDICATIONS:** Recommended for the vaccination of healthy horses as an aid in the prevention of Potomac Horse Fever (equine monocytic ehrlichiosis) caused by E. risticii.

**DOSAGE:** For primary vaccination, aseptically inject 1 mL (1 dose) intramuscularly into healthy horses 3 months of age or older. Revaccinate with a second 1 mL dose 3 to 4 weeks later. Revaccinate annually with a single 1 mL dose.

**PRECAUTIONS:** Store at 2-7°C (35-45°F). Do not freeze. Use entire contents when first opened. Shake well before using. Contains gentamicin as a preservative. Do not vaccinate within 21 days prior to slaughter. In rare instances, administration of vaccines may cause lethargy, fever, and inflammatory or hypersensitivity types of reactions. Treatment may include antihistamines, anti-inflammatories, and/or epinephrine. Vaccinating animals whose immune response is compromised by stress, disease, etc. may not produce the desired results.

**SOLD TO VETERINARIANS ONLY.**

For Veterinary Use Only.
