Safe use in pregnant animals or animals intended for breeding has not been proven. Use with caution in horses that are prone to bleed. Do not use prior to surgery or with pre-existing anemia. If animal's condition worsens or does not improve, stop product administration and consult your veterinarian.

## WARNINGS

For use in horses only. Keep out of reach of children and animals. In case of accidental overdose, contact a health professional immediately. This product should not be given to animals intended for human consumption.

Keep container tightly closed and store in a cool dry place.

Filled to weight, not volume. Settling may occur. If packed, agitate to reestablish normal density.

# FlyAway Garlic®

Cold Pressed Garlic for Equine Immune System Support

FlyAway Garlic® is traditionally used to help support healthy immune, respiratory and digestive systems in horses, and also has an antibiotic capacity. FlyAway Garlic® was also formulated to help horses deal with flies and biting insects, and is very economical for large facilities and groups of horses. FlyAway Garlic® is 100% cold pressed garlic powder, the purest form available. The cold pressed process prevents sulfur from being released; the product remains rich in sulfur which is digested and then leaves the body in sweat and feces which, repels pests from your horse.

**Providing horses with the medicinal and nutritional herbs they naturally eat was Stacey Small's goal after her success with Sore No More. Taught by a team of the world's top herbalists, Stacey produced Equilite Herbals; an all natural equine supplementation program developed by careful formulation and herb selection. Due to their purity and effectiveness, Equilite Herbals have become the horse owner's foundation in naturally supporting their horse's health.**

## DIRECTIONS FOR USE

**Regular Daily Use:** One to two scoops in the morning and one to two scoops in the evening per 1100 lb (500 kg) of body weight.
